

Eureka Moments!

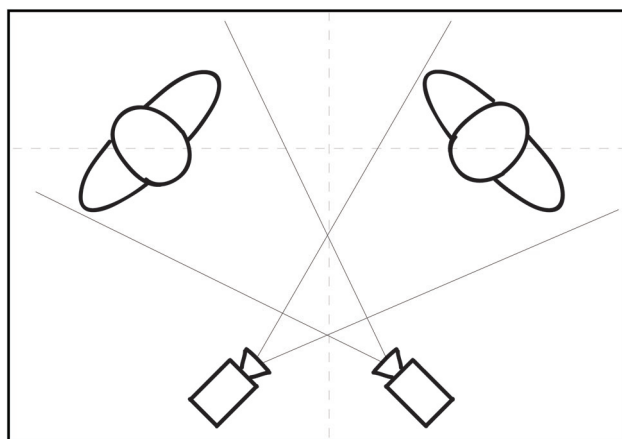

Reliving the experience of critical moments of discovery in medical science that have changed the way we live

Filming Fundamentals

A Guide for Teachers using the “Eureka Moments” Classroom Action Pack

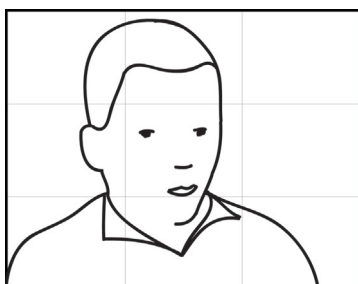

Crossing the Line

Position two people at 90 degrees to each other and imagine a line drawn through them. As you cut between them, the camera should remain on the same side of the “line” for correct continuity.

The two camera positions A and B will produce horizontally balanced shots like these:

Shot from Camera A

Shot from Camera B
